

Description

The PF10C is comprised of a water filter housing and a 5 microns filter cartridge. The water filter housing and 5 microns filter cartridge are both made of polypropylene, which has an excellent chemical resistance to most acids, alcohol, ammonia, oils, plating solutions, beverages, and water.

PF10C Water Filter

Technical Specifications

Description	Water Filter Housing
Inlet and outlet size	¾" [DN20]
Material	Polypropylene
Maximum pressure	125 PSI [862 kPa]
Maximum temperature	125°F [52°C]

Description	5 Microns Filter Cartridge
Pore size	5µm
Maximum temperature	125°F [52°C]
Filter media material	Multi-layered polypropylene fiber
