The HECB Intelligent Controller for Electric Duct Heaters offers these possibilities:

- Native BACnet MS/TP and Modbus
- BMS integration
- Automatic load shedding
- Limit electric heater consumption based on multiple variables
- Remote monitoring
- Real-Time Data and Trending

Lior Golani, our Europe Business Development Manager was on hand to receive the nomination. We wish to congratulate all the BCIA awards participants for their contribution to the industry and hope to see you again in 2016 for the next edition.

The Building Controls Industry Association (BCIA) awards recognize members of the controls industry for their achievements and contribution to the industry's advancement. The Awards are judged by an independent judging panel consisting of representatives from the construction sector, research organizations and academia including BSRIA; B&ES; CIBSE's FM Group; University College London and the editor of Modern Building Services magazine.

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

www.neptronic.com

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
