Neptronic at the 2015 Niagara Forum

Montreal, QC, June 1, 2015 - Neptronic participated at the 2015 Niagara Forum in London from April 19 – 21 and exhibited its HVAC Controls product line.

The company took advantage of the opportunity to showcase its new generation of networkable controllers to the over 500 participants.

Neptronic application specific controllers have a solid reputation as terminal equipment that provides easy integration and cutting-edge features.

The Niagara Forum is an event bringing together the Niagara Community to learn more about the Niagara Framework, exchange ideas, and make connections with other industry leaders. It provides an opportunity to gain insight into emerging trends and technologies.

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
