Neptronic at ASHRAE Montreal

Montreal, QC, April 22, 2016 – Our Montreal representative, The Jess Company Ltd. exhibited at the April ASHRAE Montreal Dinner-Conference on April 11 at the Club St-James. They brought a working demo showcasing how Neptronic controls can be used to control EC motored fans.

The featured products were Loren Cook Vari-Flow[®] equipped Neptronic's humidity and temperature controller as well as our static pressure controller and our soon-to-be-released CO₂ controller. Numerous attendees showed a lot of interest in the many functionalities of our controls and the energy efficiency that they allow.

Neptronic would like to thank everyone who came to see us and we hope you enjoyed the event.

For more information on Neptronic products featured in this articles, visit the controls section of our [website](#).

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.

For more information visit the Neptronic website at www.neptronic.com.
