

## For Immediate Release

### CETAF Building Systems Gathering

**Montreal, QC, April 27, 2016** – On April 21, Neptronic attended a local show held by the CETAF on Building Systems which took place in Rimouski. Amongst our different product lines presented, our new Networkable Duct Heaters seemed to have captured a great deal of interest. We also benefited from this opportunity to meet with building engineering students of the region.

We are proud to support our local organization in their effort to represent the HVAC industry. The CETAF is a non-for profit organization gathering close to 340 companies in the heating and cooling industry.

### About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft<sup>2</sup> (7,500 m<sup>2</sup>) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
