The 2016 Niagara Summit

Connecting the World

Montreal, Canada | May 26, 2016 – Neptronic attended the 2016 Niagara Summit in New Orleans. The event was a great success and we are pleased to have participated again this year. We had the chance to exchange with our system integrators and meet with new international agents.

The Niagara Summit gathers developers, programmers, building engineers and executives to share ideas and discuss industry trends. This year's focus was on connected devices and systems and the advancements to the Niagara Framework. In essence, it's all about moving from the edge to the cloud.

About Neptronic:

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software, firmware and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing and production.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
