Neptronic Controls Now BTL Certified to Version 14

Montreal, Canada | June 1, 2016 – Neptronic controls are now BTL certified to version 14. These controllers are classified **B-ASC** (BACnet Application Specific Controller). BACnet Testing Laboratories ensures conformity to standards by conducting rigorous compliance and interoperability testing.

Our entirely configurable controls with BACnet MS/TP communication offer seamless and simple integration.

Our controls now feature these additional BACnet functions:

- Firmware upgradable via the BACnet restore service with the file and program objects
- Configure a weekly schedule with up to 6 events per day
- Up to 10 COV notification per controller
- Commandable outputs (AO and BO) with “priority array” for management of multiple “writes”
- The possibility to remotely restart the controller by using the “Reinitialize Device cold or warm reset” service

Neptronic controllers certified to version 14 include the EFCB, EVCB, TUCB Application Specific Controllers.

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
