

## **Neptronic Appoints New Regional Sales Manager**

**Montreal, Canada | November 16, 2017** - Neptronic would like to introduce Josiah Strauss as the new Regional Sales Manager in our recently established Colorado sales office.

Josiah worked in the Oil and Gas industry since 2013, performing exploration and environmental consulting in North American and Overseas regions. Prior to that, Josiah held two academic posts at Duke University and at the University of New South Wales in Australia where he worked on various projects related to environmental changes and their impacts. He also holds a PhD in Earth and Environmental Sciences from Texas A&M University, and a BSC and MSC in Geology from Florida Atlantic University.

He brings to Neptronic an understanding of the climate interactions within the built environment and due to his background in hydrology, an understanding of the impacts of water quality on humidification. Since he started working at Neptronic, Josiah has expanded our water treatment offerings, fielded all the water treatment questions and given several webinars/talks on the subject to representatives and industry members.

As Regional Sales Manager, Josiah will be the liaison between agents and Neptronic; he will offer support regarding any issues that arise, assist with training, as well as aid agents during local shows. He will be covering the Humidifier, Electric Duct Heater, and Controls divisions.

He will be covering the following territories: North Dakota, South Dakota, Nebraska, Colorado, Kansas, Minnesota, Iowa, Missouri, Arkansas, Louisiana, Wisconsin, and Illinois, as well as Alberta.

We are pleased to have Josiah join our team and we wish him great success!

*Josiah Strauss, Regional Sales Manager*

## **About Neptronic**

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft<sup>2</sup> (7,500 m<sup>2</sup>) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 75% of its sales through an exclusive distribution network for the HVAC industry worldwide
